Address

Required fields are in Bold Blue.

Enter your full name the way you would like it to appear on your package shipping label. iShip.com will send shipping and tracking messages to the e-mail address you provide.

Your Name: John Shipper
E-mail: ishipper@anyisp.com

Enter your return address. This should not be a P.O. Box unless you intend to only ship with the USPS. Packages shipped with other carriers cannot be returned to P.O. Boxes.

Company: Any Company
Street: 1234 N. Main Street
Floor/Room: Suite 567
Department: Operations
City: Yourtown
State: AL - Alabama
Zip Code: 20002-1001
Telephone: (524) 555-4321
Fax: (524) 555-1234

Help

E-Commerce
If you sell your products using online auctions, classified services or your own Web Site iShip.com can offer you a way to not only show your Buyers what they will pay for shipping, but also automate the entire post-sale process
We will help you notify the Buyer of the total sale price - including shipping, getting the Buyer's shipping selections, getting the shipping address and even collecting credit card information for you to process. We can also let you add your business's handling charges without having to calculate percentages or subtotals. We do the work for you.
To setup your Selling Preferences you will need to do only three easy steps:

1. Select the services you will use to ship your products. The Buyers will see only the services you select.
2. Select how your shipping charges are displayed. Is your shipping included in the sale? Do you charge for handling? We will make sure the price is right.
3. Select what kinds of payment you accept. We will find out how the Buyer is going to pay. We will even collect credit card information for you to process.

You can set these preferences up now or later, but if you would like to do it now, press Continue. Otherwise, press Finish to complete registration.

FIG. 35

Figure 1 is a screenshot of a shipping service selection interface. The interface is divided into three main sections: "Rates & Times" (1109a), "Compare Services" (1109b), and "Find Location" (1109c).

The "Rates & Times" section (1109a) features a table with columns for dates (TUE 28 SEP 99, WED 29 SEP 99, THU 30 SEP 99) and times (8:00 AM, 10:30 AM, 12:00 PM, 3:00 PM, 4:30 PM, 5:00 PM). The table contains various shipping rates and times, with some cells highlighted in yellow. The "Compare Services" section (1109b) includes buttons for "<< Back", "Next >>", "Reset", "Cancel", and "Help". The "Find Location" section (1109c) includes a text input field for "Will drop off at Retail Ship Center" and a "Find Location" button.

The interface also includes a "Date you expect to ship your package:" field set to "9/27/99 - Today" and a "Click on the price to select a delivery date, time and carrier" instruction.

FIG. 48

FIG. 49 is a schematic diagram of a computer screen displaying a web page for iShip.com. The web page is titled "The Internet Package Shipper" and prompts the user to "Enter the Cardholder information, then click Next." Below the title, there are two bullet points: "Enter the Name as it appears on the card." and "Enter the billing information as it appears on your card statement." The form includes input fields for Name (420), Street (421), State (422-1), and Zip Code (423). A dropdown menu (422-2) is shown for the State field. At the bottom of the form are buttons for "< Back", "Save", and "Help". A security notice at the top right states "This is a secure transaction!" with a padlock icon.

The Internet Package Shipper

Enter the Cardholder information, then click Next.

- Enter the Name as it appears on the card.
- Enter the billing information as it appears on your card statement.

Enc of Day

Print a driver record for packages shipped.

UPS requires its customers using computer based shipping systems to perform "End-of-Day" at least once each day a package is shipped. This will produce a driver record and send an electronic record of your packages to UPS, ensuring proper billing. This is only required, however, if you are using your own UPS account. You should perform End and print your driver record before the driver arrives.

You have shipped XX packages since your last driver pickup.

To print a driver record, press Perform End.

Perform End

Reprint

Occasionally you might need to reprint a driver record if the original was lost, damaged or was otherwise unreadable by the driver. To reprint a driver record from a previous date click Find Driver Record below. You will be shown a list of previous records in the order they were created, the most recent at the top of the list.

FIG. 78

FIG. 79 is a schematic diagram of a computer system 100. The system 100 includes a processor 110, a memory 120, and a network interface 130. The processor 110 is connected to the memory 120 and the network interface 130. The memory 120 stores data and instructions. The network interface 130 is connected to a network 140. The system 100 is configured to receive data from the network 140 and process the data. The processor 110 is configured to execute instructions stored in the memory 120. The network interface 130 is configured to transmit data to the network 140. The system 100 is configured to provide a user interface 150. The user interface 150 is configured to display data received from the network 140. The user interface 150 is configured to receive input from a user. The user interface 150 is configured to provide output to the user. The system 100 is configured to provide a secure communication channel 160. The secure communication channel 160 is configured to protect data transmitted between the system 100 and the network 140. The secure communication channel 160 is configured to protect data stored in the memory 120. The secure communication channel 160 is configured to protect data processed by the processor 110. The system 100 is configured to provide a backup and recovery system 170. The backup and recovery system 170 is configured to create a backup of data stored in the memory 120. The backup and recovery system 170 is configured to restore data from a backup. The backup and recovery system 170 is configured to test the backup and recovery system 170. The system 100 is configured to provide a disaster recovery system 180. The disaster recovery system 180 is configured to recover the system 100 from a disaster. The disaster recovery system 180 is configured to test the disaster recovery system 180. The system 100 is configured to provide a security system 190. The security system 190 is configured to protect the system 100 from unauthorized access. The security system 190 is configured to monitor the system 100 for security threats. The security system 190 is configured to respond to security threats. The system 100 is configured to provide a logging and auditing system 200. The logging and auditing system 200 is configured to log system events. The logging and auditing system 200 is configured to audit system events. The logging and auditing system 200 is configured to generate reports on system events. The system 100 is configured to provide a performance monitoring system 210. The performance monitoring system 210 is configured to monitor the performance of the system 100. The performance monitoring system 210 is configured to generate reports on system performance. The system 100 is configured to provide a configuration management system 220. The configuration management system 220 is configured to manage the configuration of the system 100. The configuration management system 220 is configured to track changes to the system 100. The configuration management system 220 is configured to restore the system 100 to a previous configuration. The system 100 is configured to provide a change management system 230. The change management system 230 is configured to manage changes to the system 100. The change management system 230 is configured to track changes to the system 100. The change management system 230 is configured to implement changes to the system 100. The system 100 is configured to provide a project management system 240. The project management system 240 is configured to manage projects. The project management system 240 is configured to track project progress. The project management system 240 is configured to generate reports on project progress. The system 100 is configured to provide a time and expense tracking system 250. The time and expense tracking system 250 is configured to track time and expenses. The time and expense tracking system 250 is configured to generate reports on time and expenses. The system 100 is configured to provide a human resources system 260. The human resources system 260 is configured to manage human resources. The human resources system 260 is configured to track employee information. The human resources system 260 is configured to generate reports on employee information. The system 100 is configured to provide a financial system 270. Tracking

Complete the fields below to add a package to your inbound Package list.

Enter the tracking number of the package you want to add to your Inbound Package list.

Select the carrier if known or, if no carrier is selected, we will attempt to determine the carrier from the number entered. You can enter an Order/Item No. to help you identify the package.

Tracking Number:

1Z8595610344113190

Carrier:

UPS

Order/Item:

Check the box below if you would like to be notified by e-mail when the package is delivered.

We can also notify up to two others. You can include a brief message to be sent with E-mail.

☒

Notify me when the package has been delivered.
